

CRPF provides free medical consultation and medicines to more than 500 in Sopore

The 179 Battalion of CRPF organised a free medical camp at Chinkipora, Sopore, J&K to render much sought medical consultation and free medicines to the local population. More than 500 people were provided consultation and medicines in the camp. For CRPF, which always reinforces its social connect by communication and reaching out to the people in their area of deployment, this is yet another initiative to cater to the needs of the citizens. While a dedicated CRPF Madadgaar helpline is in place to aid the people of J&K, CRPF Battalions also undertake welfare related activities.

The camp was also used as a platform to raise awareness about COVID appropriate behaviours and distribute sanitization kits to the participants. The attendees were informed about the importance of masks, sanitization, social distancing and the role of vaccination in the fight against the pandemic.
