

## **E-Kit Ledger**

The e-Kit Ledger was introduced in July 2023. It is a digital system integrated with the Sambhav application to manage and track the issuance of kit items to Jawans through the SELO platform.

### **Function:**

- Digitising the records of all kit items issued to personnel.
- Reflects kit issuance details directly in the Sambhav application under the "Kit Ledger" option.
- Includes reports like KIUL distribution, unit-wise issues, and force-number-wise issued items through SSRS.

### **Benefits:**

- Streamlines the e-vetting process, replacing manual vetting of annual demands for kit items.
- Ensures transparency and easy access to kit issuance records.
