

NFMS (New Financial Management System):

NFMS was developed in 2018. NFMS integrates budget management, inventory control, and procurement processes for the CRPF.

Features:

- **Financial Management:** Provides a comprehensive view of CRPF's financial activities, enabling better budgeting, resource allocation, and expenditure monitoring.
- **Centralized Monitoring:** Enables centralized oversight and control over CRPF's financial activities.

Benefits:

- Enhanced financial management and planning capabilities.
- Improved decision-making through access to financial data and insights.
- Increased transparency and accountability in financial operations.
