Rain Caps

ANNEXURE

Annexure-0

80

General Technical Requirement:-

Packing:- As per clause-11 of the governing specification.

Marking:- A suitable white satin cloth lable of size 6cmsX3cms shall be machine stitched with polyester thread of matching colour inside of the neck, duly printed with the following particulars:-

- a) Nomenclature of the stores.
- b) Size.
- c) Manufacturer's Name.
- d) Year of manufacture.

In addition warning shall also be marked in English and Hindi as under:-  
"Garments shall be thoroughly dried in the shade and dusted with French Chalk before folding".

NOTE:- All successful tenderers shall offer the stores for inspection along with their internal test certificates for test carried out by them as per requirement mentioned under essential test facilities in the eligibility criteria.

(1) ACCEPTANCE MARKING:-

Each accepted Rain Cape shall be legibly stamped by the QA officer with indelible ink /paint on the corner.

(2) SAMPLE CLAUSE:-

A. Approved Samples-

In case where Supply Order (S.O.) stipulates samples to be approved by the indentor before bulk manufacture, the supplier shall submit within 21 days of receipt of S.O. three (3) identical sets of samples as per contract specification for indentor's approval through the Inspecting Officer. Each set shall contain 1 No. complete Rain Cape + 2 Nos. min. cuttings of size 30cmsX30cms of Rain Cape (Total 3 Nos. min.) of sample each of item depicting indeterminable parameters such as Shade, makeup, finish and workmanship.

On receipt of samples the Inspecting Officer shall examine the samples for size/dimensions, constructions of fabric (Where applicable), pattern to verify if they are as per required specification and if found satisfactory shall forward the same to the indentor for his approval in respect of indeterminable parameters.

In case these paramters meet the requirement of indentor he shall label and seal the samples with remarks as "Approved" or "Not Approved". Indentor shall retain one set of sample with him, forward one set to the Inspecting Officer concerned and the balance one set to supplier for his guidance. Since approval of single sample will not give adequate indication of variation in shade, size, makeup, finish and workmanship etc. approval of just one sample in a set will not be accepted. It is therefore, necessary that at least two of the three samples meet the approval of indentor to depict acceptable variation in indeterminable paramters.

Samples approved as above shall be known as "Approved Samples".

In the event of indentor having a repeat order under the current R/C on the same supplier, the samples approved in earlier S.O. can be adopted against the subsequent S.O.

Failure to submit the sample by stipulated date or in the event of the sample being rejected by Inspecting authority or by indentor, the S.O. shall be liable to be cancelled at the risk and expense of the contractor without any further reference to the supplier. The purchaser shall also be entitled to take contractual/administrative and other remedial measures including short-closure of the rate contract. During manufacture/inspection of stores before despatch it shall be ensured that offered/ accepted lot shall be similar in appearance, shade, size, make up, finish and workmanship etc. when compared with approved sample.

(B) Representative Samples-

During the course of inspection, samples will be drawn for detailed examination and tests as laid down in the specifications. The inspecting officer shall simultaneously draw additional two samples similar to samples drawn for detailed

tests to be sent for each of consignees alongwith accepted lot. All these samples should conform to the approved samples in respect of indeterminable parameters such as shade, size, make up, finish and workmanship etc. These samples shall be known as "Representative Samples". The representative samples shall be labeled and sealed by the inspecting officer and forwarded to the consignees with the lot. The bale/packing in which these samples are kept shall be clearly indicated in the inspection note for each consignee. Consignees will be guided by these samples to determine whether the same lot as has been inspected and accepted by the inspecting officer has been despatched by the supplier.

Single Texture White Rubberised Water proof Nylon Fabric Rain Capes With Attached Hood.

Specification :G/TEX/MISC/43/ST RAIN CAPES NYLON (made from Nylon Single Texture Rubberised Waterproof Fabric)
