## **Instructions for Online Bid Submission**

As per the directives of Department of Expenditure, this tender document has been published on the Central Public Procurement Portal (URL: <https://eprocure.gov.in>). The bidders are required to submit soft copies of their bids electronically on the CPP Portal, using valid Digital Signature Certificates. The instructions given below are meant to assist the bidders in registering on the CPP Portal, prepare their bids in accordance with the requirements and submitting their bids online on the CPP Portal. More information useful for submitting online bids on the CPP Portal may be obtained at: <https://eprocure.gov.in/eprocure/app>.

### **REGISTRATION:-**

- 1) Bidders are required to enroll on the e-Procurement module of the Central Public Procurement Portal (URL: <https://eprocure.gov.in/eprocure/app>) by clicking on the link “**Click here to Enroll**” on the CPP Portal is free of charge.
- 2) As part of the enrolment process, the bidders will be required to choose a unique username and assign a password for their accounts.
- 3) Bidders are advised to register their valid email address and mobile numbers as part of the registration process. These would be used for any communication from the CPP Portal.
- 4) Upon enrolment, the bidders will be required to register their valid Digital Signature Certificate (Class II or Class III Certificates with signing key usage) issued by any Certifying Authority recognized by CCA India (e.g. Sify / TCS / nCode / eMudhra etc.), with their profile.
- 5) Only one valid DSC should be registered by a bidder. Please note that the bidders are responsible to ensure that they do not lend their DSCs to others which may lead to misuse.
- 6) Bidder then logs in to the site through the secured log-in by entering their user ID / password and the password of the DSC / e-Token.

## **SEARCHINGFORTENDERDOCUMENTS:-**

- 1) There are various search options built in the CPP Portal, to facilitate bidders to search active tenders by several parameters. These parameters could include Tender ID, organization name, location, date, value, etc. There is also an option of advanced search for tenders, wherein the bidders may combine a number of search parameters such as organization name, form of contract, location, date, other keywords etc. to search for a tender published on the CPP Portal.
- 2) Once the bidders have selected the tenders they are interested in, they may download the required documents/tender schedules. These tenders can be moved to the respective 'My Tenders' folder. This would enable the CPP Portal to intimate the bidders through SMS / e-mail in case there is any corrigendum issued to the tender document.
- 3) The bidder should make a note of the unique Tender ID assigned to each tender, in case they want to obtain any clarification / help from the Helpdesk.

## **PREPARATION OF BIDS :-**

- 1) Bidder should take into account any corrigendum published on the tender document before submitting their bids.
- 2) Please go through the tender advertisement and the tender document carefully to understand the documents required to be submitted as part of the bid. Please note the number of covers in which the bid documents have to be submitted, the number of documents - including the names and content of each of the document that need to be submitted. Any deviations from these may lead to rejection of the bid.
- 3) Bidder, in advance, should get ready the bid documents to be submitted as indicated in the tender document/ schedule and generally, they can be in PDF / XLS / RAR / DWF formats. Bid documents may be scanned with 100 dpi with black and white option.
- 4) To avoid the time and effort required in uploading the same set of standard documents which are required to be submitted as a part of every bid, a provision of uploading such standard documents (e.g. PAN card copy, annual reports, auditor certificates etc.) has been provided to the bidders. Bidders can use "My Space" area available to them to upload such documents. These documents may be directly submitted from the "My Space" area while submitting a bid, and need not be uploaded again and again. This will lead to a reduction in the time required for bid submission process.
- 5) **TWO BID SYSTEM:-**  
As per rule-163 of GFR-2017 all bidders are required to submit their offers in two covers as under):

a) **FIRST COVER (TECHNICAL BID)** should contain following detail:-

1. Documents to be submitted in original manually and to be dropped in the tender box in a sealed envelop

**b) SECOND COVER:-**

Price bid/commercial bid-BOQ in excel for

**SUBMISSION OF BIDS:**

- 1) Bidder should log into the site well in advance for bid submission so that he/she upload the bid in time i.e. on or before the bid submission time. Bidder will be responsible for any delay due to other issues.
- 2) The bidder has to digitally sign and upload the required bid documents one by one as indicated in the tender document.
- 3) Bidder has to select the payment option as “offline” to pay the tender fee as applicable and enter details of the instrument.
- 4) Bidders are requested to note that they should necessarily submit their financial bids in the format provided and no other format is acceptable. If the prices bid have been given as a standard BoQ format with the tender document, then the same is to be downloaded and to be filled by all the bidders. Bidders are required to download the

BoQ file, open it and complete the white colored (unprotected) Cells with their respective financial quotes and other details (such as name of the bidder). No other cells should be changed. Once the details have been completed, the bidder should save it and submit it online, without changing the filename. If the BoQ file is found to be modified by the bidder, the bid will be rejected.

- 5) The server time (which is displayed on the bidder's dashboard) will be considered as the standard time for referencing the deadlines for submission of the bids by the bidders, opening of bids etc. The bidders should follow this time during bid submission.
- 6) All the documents being submitted by the bidders would be encrypted using PKI encryption technique to ensure the secrecy of the data. The data entered cannot be viewed by unauthorized persons until the time of bid opening. The confidentiality of the bids is maintained using the secured Socket Layer 128 bit encryption technology. Data storage encryption of sensitive fields is done.
- 7) The uploaded tender documents become readable only after the tender opening by the authorized bid openers.
- 8) Upon the successful and timely submission of bids, the portal will give a successful bid submission message & a bid summary will be displayed with the bid No. and the date & time of submission of the bid with all other relevant details.
- 9) The bid summary has to be printed and kept as an acknowledgement of the submission of the bid. This acknowledgement may be used as an entry pass for any bid opening meetings.

#### **ASSISTANCE TO BIDDERS:-**

- 1) Any queries relating to the tender document and the terms and conditions contained therein should be addressed to the Tender Inviting Authority for a tender or the relevant contact person indicated in the tender.
- 2) Any queries relating to the process of online bid submission or queries relating to CPP Portal in general may be directed to the 24x7 CPP Portal Helpdesk. The contact number for the helpdesk is 1800 233 7315.

(Signature of Tender Form issuing officer)

(Signature of Tenderer)

## ADDITIONAL CONDITIONS

1. The contractors are advised to get acquainted with the proposed work and its site and also study the Architectural Drawings, specifications and special conditions carefully before tendering. No claim of any sort shall be entertained on account of any site conditions and ignorance of specifications and special conditions.
2. The work shall be carried out as CPWD specifications 2009 Vol. I & II with up to date correction slips unless otherwise specified in the nomenclature of individual item or in the specifications and special conditions, where specifications are silent, the decision of Competent Authority shall be final and binding on contractors.
3. The rates quoted by the contractor shall be taken as net and nothing extra shall be paid on any account i.e. royalty, cartage, sales tax, GST etc.
4. The rates for different items of work shall apply for all heights and depths, leads and lifts unless otherwise specified in the agreement or specifications applicable to the agreement.
5. Any damage done by the contractor to any existing work during the course of execution of the work shall be corrected by him at his own cost.
6. Articles manufactured by the reputed firms and approved by Commandant Engineer/Engineer in-charge, shall only be used. Only articles classified, as 'first quality' by the manufacturer shall be used unless otherwise specified. In case articles bearing ISI certification are not available in the market, quality of samples brought by the contractor shall be judged by standards laid down in the relevant BIS specifications. For the items not covered by CPWD specifications relevant BIS standards shall apply. The sample of materials to be brought to site for use in work shall be got approved from the Commandant Engineer/Engineer-in-charge actual execution of work.
7. Samples of materials required for testing shall be provided free of cost by the contractor. Testing charges, if any, shall be borne by the contractor. All the expenditure to be incurred for taking samples, conveyance, packing etc. shall be borne by the contractor.
8. The contractor shall submit a detailed program of work within **07 days** of the date of award of work. The Competent authority can modify the program and the contractor shall have to work accordingly.
9. The quantities of each item shall not be exceeded beyond the agreement, quantities without prior permission of Commandant Engineer, South Zone.
10. Statutory deductions on account of GST, income tax and surcharge as applicable shall be made from the gross amount of the bill.
11. The contractor shall make his own arrangements for obtaining electric connection, if required and make necessary payments directly to the department concerned.
12. The contractor shall make his own arrangement for getting the permission to ply the trucks from the traffic police.
13. No payment shall be made to the contractor for any damage caused by rain, snow fall, floods or any other natural causes whatsoever during the execution of work. The damage caused to work shall have to be made good by the contractor at his own cost and no claim on this account shall be entertained.
14. Other agencies may also simultaneously be executing other building works for

thesame building, along with this work. The contractor shall afford necessary facilities for the same and no claim in the matter shall be entertained. The contractor shall especially co-ordinate with the other agency carrying out his work.

15. Some restrictions may be imposed by the security staff etc. on the working and or movement of labour and materials, etc. the contractor shall be bound to follow all such restrictions / instructions and nothing shall be payable on this account.

16. The contractor shall take all precautions to avoid accidents by exhibiting necessary caution boards. He shall be responsible for all damages and accidents caused due to negligence on his part. No hindrance shall be caused to traffic during the execution of the work by storing materials on the road and contractor / firm only will be liable to bear the cost of damage and compensation to any labour in case of any accident.

17. The contractor shall be fully responsible for the safe custody of the material issued or brought by him to site for doing the work.

18. Testing of materials:-

In case there is any discrepancy in the frequency of testing as given in the list of mandatory test and that in the individual sub-head of work as per the CPWD specifications 2009 Vol. I to II with up to date correction slips, the higher of the two frequencies shall be followed and nothing extra shall be payable to the contractor on this account. Samples of all fittings and fixture to be provided shall be got approved from the Engineer-in-charge before use in the work.)

19. The rate for all items of work, shall unless otherwise clearly specified include cost of all labour, material and other inputs involved in the execution of the items.

20. The order of preference in case of any discrepancy as indicated in condition No. under "Conditions of contract" given in the General Conditions of contract for CPWD work 2019 form may be read as the following):

A) Description of Schedule of quantities.

B) Additional Specification's and special conditions, if any

C) Contract clauses of General conditions of contract for Central P.W.D.works 2019 form.

D) CPWD Specifications

E) Drawings

F) Indian Standard Specifications / BIS

G) Sound engineering practice.

Any reference made to any Indian Standard Specifications in these documents, shall imply to the latest version of that standard, including such revisions / amendments as issued by the Bureau of Indian Standards up to last date of receipt of tenders. The contractor shall keep at his own cost all such publications of relevant Indian Standards applicable to the work at site.

21. The contractor shall make his own arrangement of water for construction and drinking purpose as well for electricity and its distribution at his own cost. The department will render only assistance to the contractor for making application to JB / authorized Electric supply agency, if required. All the fees and charges including consumption charges shall be borne by the contractor.

22. The contractor will not have any claim in case of any delay by the The Commandant, 2 Signal BN, CRPF, Hyderabad in removal of trees or shifting, removing of telegraph, telephone or electric lines (overhead or underground), water and sewer lines and other structure etc., if any which may come in the way of the work. However, suitable extension of time can be granted to cover such delay.

23. The contractor shall clean the site thoroughly of scaffolding materials, rubbish, equipments left out of his work and dress the site around the building to the complete satisfaction of Engineer-in-charge before the work is treated as completed.

24. After survey all drawings and basic data shall be property of the CRPF and contractor submit the undertaking for not using for any other purpose and anywhere else in future.

25. The malba/ garbage generated at site due to construction activities shall be removed from the site immediately & shall be disposed-off by the contractor to the approved dumping site identified by The Commandant 2 Signal BN CRPF, Hyderabad. The surplus soil / earth shall be disposed off as per the directions of Engineer in charge, separately

(Signature of Tender Form issuing officer)

(Signature of Tenderer)

## ADDITIONAL SPECIAL CONDITIONS

- 1.1 In case there is any discrepancy between English Version and corresponding Hindiversion, if provided, then the provisions in English Version will prevail.
- 1.1.1 During COVID-19 Pandemic the guideline issued by the Government should be followed strictly.
- 1.1.2 It is advised that the huts for labourers are not to be permitted in camp area.
- 1.1.3 It is not permitted to have extension of time in completion of said work.
- 1.2 Wherever any reference to any Indian Standard Specifications/ International standard occurs in the documents relating to this contract, the same shall be inclusive of all amendments issued there-to or revisions thereof, if any, up to the date of receipt of tenders.
- 1.3 Samples for particular items of work shall be prepared, where so specifically desired by Engineer-in-charge, for prior approval of the Engineer-in-charge, before taking up the same on mass scale and nothing shall be payable on this account
- 1.4 Wherever desired by Engineer-in-charge, the contractor shall also construct a sample unit complete in all respect within time specified by the Engineer-in-charge & this sample unit shall be got approved from the Engineer-in-charge before mass construction is taken up. No extra claim, whatsoever beyond the payment due at agreement rates, will be entertained to the contractor on this account.
- 1.5 The contractor shall take instructions from the Engineer-in-charge for stacking of materials at site.
- 1.6 If as per municipal rules, or due to any other restrictions, the huts for labourers are not to be erected at the site of work by the contractors, then the contractors shall provide such accommodation at such locations as are acceptable to local bodies, or contractor shall make his own alternative arrangement for stay of labourers outside the site of work, for which nothing extra shall be payable.
- 1.7 Unless otherwise specifically provided in the Schedule of quantities, the rates tendered by the contractor shall be all inclusive and nothing extra quoted rates in agreement shall be payable to him on this account.
- 1.8 The structural and architectural drawings shall be properly correlated before executing the work. In case of any difference noticed between architectural and structural drawings, final decision, in writing of the Engineer-in-charge shall be obtained by the contractor before proceeding further.
- 1.9 If ISI marked products are available, the contractor shall use only ISI marked products. In other cases, the materials shall conform to CPWD specifications. In case a materials/product is neither covered by ISI nor by CPWD specification, the work shall be carried out as per sound engineering practice, in such case, the decisions of the Engineer-in-charge shall be final & binding. In such cases Engineer-in-charge shall satisfy himself about the quality of such materials and give his approval in writing. Only articles classified as first quality by the manufacturers shall be used, unless otherwise specified. All materials not bearing ISI mark shall be tested as per relevant ISI specifications. The Engineer-in-charge may relax the condition regarding testing if the quantity of the materials required for the work is small. In all cases of use of ISI marked materials, proper proof of procurement of materials from authentic manufacturers shall be provided by the contractor to the entire satisfaction of Engineer-in-charge.

- 1.10 Some restrictions may be imposed by the security staff etc. on the working and for movement of labour, materials etc. The contractor shall be bound to follow all such restriction / instructions and nothing extra shall be payable on this account.
- 1.11 Other agencies doing works related with this project will also simultaneously execute the work and the contractor shall afford necessary facilities for the same. Nothing extra over the agreement rates shall be paid for the same. The contractor shall extend necessary co-operation to other such agencies without any claim on this account.
- 1.12 Cast iron pipes and fittings without ears shall be used. However, pipes and fittings with ears may be accepted without any extra payment. In such cases, clamps are not required and no extra payment shall be made for fixing the pipes in a different manner.
- 1.13 No claim for idle establishment & labour, machinery & equipments, tools & plants and the like, for any reason whatsoever, shall be admissible during the execution of work as well as after its completion.
- 1.14 The building work will be carried out in the manner complying in all respect with the requirements of relevant bylaws of the local body under the jurisdiction of which the work is to be executed or as directed by the Engineer-in-charge and nothing extra will be paid on this account.
- 1.15 Any damage to work resulting from weathering conditions, defacing or from any other cause such as negligent act on the part of contractor, until the work is taken over by the Department after completion of work, shall be made good by the contractor at his own Cost.
- 1.16 To avoid disputes later on, contractor is advised to get the measurement recorded within **a week's time** and shall submit his bills as per relevant clause (6A) of contract. Any dispute regarding measurement including work done shall be judged within a week's time failing which no measurement, certified and recorded, shall be entertained.
- 1.17 Any damage to the building, furniture, fittings of any other articles etc. done by the contractor or his workmen during the execution of work, shall be made good by the contractor, failing which the same shall be made good by the Engineer-in-charge or his authorized representative at the risk and cost of the contractor.

- 1.18 Full quantity of material such as paint plastic emulsion paint, water proofing cement paint etc. shall be deposited in sealed container in advance and get it checked by Engineer-in-charge before use.
- 1.19 No labour huts shall be allowed inside the campus of above said work. The contractors shall arrange for the stay of labours outside the campus including transport and nothing extra shall be payable on this account.)
- 1.20 The SOS mess under repair shall be handed over to contractor in phased manner as required. However contractor shall make arrangement for up gradation work.
- 1.21 Testing of Materials
  - a) Samples of various materials required for testing shall be provided free of cost by the contractor. Testing charges, if any, shall be borne by the contractor including All other expenditures required to be incurred for taking the samples, conveyance, packing etc.
  - b) The contractor shall produce all the materials in advance so that there is sufficient time for testing and approval of the materials and clearance before use in work . The Engineer in charge shall be at liberty to test representative sample(s) of each item of schedule of quantity in any approved laboratory as decided by him. The sample of testing shall be provided by the contractor free of cost. Any expenditure required to be incurred for taking sample, conveyance and packing shall be borne by the contractor. In case of any sample of particular lot fails in testing the contractor shall be bound to replace the entire lot with fresh material of prescribed specifications. The rejected lot shall be returned to the contractor only after fresh lot is supplied. Testing charge in respect of failed sample will be recovered from the contractor.
- 1.22 No labour huts shall be allowed inside the campus of above said work. The contractor shall make his own arrangement for the stay of labour outside the campus including transportation and nothing extra shall be payable on this account.
- 1.23 The work is required to be executed in restricted site in odd hours and the agency shall plan the work to be carried out accordingly.
- 1.24 There may be some restrictions on free movement of labourers at site and restriction of working hours and the agency shall consider this fact while quoting the rates and executing the work. Photo passes if any required for worker shall be responsibility of the contractor.
- 1.25 Existing drains, pipes, cables, overheads wires, sewer lines and water lines and similar services encountered in the course of the execution of the work shall be protected against the damage by the contractor at his expenses. The contractor shall not store materials or otherwise occupy any part of the site in a manner likely to hinder the operation of such services.
- 1.26 The Engineer employed by the contractor must attend the office of Engineer in charge daily and note any instructions given on site order book.
- 1.27 Splashes on the floors, walls, glasses & other places must be removed after completion of work. The work of cleaning will be got done at the risk and cost of the agency.
- 1.28 Before starting the work the contractor shall chalk out a program in consultation with the Engineer in charge so as to inform the occupants in advance. The contractor shall have to adhere to this program, failing which he shall be held responsible for any

inconvenience caused to the occupants. In order to ensure that the work is carried out according to the program drawn up, the contractor shall ensure adequate supply of the material and employ required labour strength for execution of work. In case contractor fails to arrange / employ adequate labour and stick to the program, the Engineer in charge may supplement the labour at the risk and cost of the contractor after issue of one day's notice to the contractor through site order book. No claim for idle labour shall be entertained. The contractor shall put his representative daily on site of work. His name & signature shall be attested by the contractor on the record for the department.

- 1.29 The contractor shall prepare one sample of all items which should be got approved from the Engineer in charge. Only after acceptance of sample work, contractor will be allowed to commence the work and sample is to be preserved by contractor till the whole work is completed. The quality of work should confirm to the approved samples.
- 1.30 The contractor should note that the items of work in any room shall be undertaken at one time, one after the other and completed at one stretch in reasonable time allotted for the same by Engineer in charge and got noted by the Junior Engineer in charge. Any item left over in will be got done at his risk and cost without any further notice (other than one entry in the site order book) to the contractor after one day from the date of entry in the site order book.
- 1.31 No T & P shall be supplied by the department.
- 1.32 Any damage done to the existing structure shall be made good by the contractor at his own risk and cost.
- 1.33 The contractor shall be responsible for behavior and conduct of his worker. No worker with doubtful integrity or having a bad record shall be engaged by the contractor.
- 1.34 Any cement slurry, required to be added over base surface for bond or for continuation of concreting, its cost shall be deemed to have been included in the respective items, unless specified otherwise and nothing extra shall be payable nor extra cement shall be considered in the cement consumption on this account.
- 1.35 Stacking of materials and excavated earth including its disposal shall be done as per the directions of the Engineer-in-Charge.  
Double handling of materials or excavated earth, if required, shall have to be done by the contractor at his own cost.
- 1.36 The contractor shall give a performance test of the entire installation(s), as per standing specifications, before the work is finally accepted and nothing extra whatsoever shall be payable to the contractor for the test.
- 1.37 The work of water supply, internal sanitary installations and the drainage work etc may required to be carried out as per local Municipal Corporation or such local body-Bylaws and the contractor in such cases shall produce necessary completion certificate from such authorities after completion of the work.
- 1.38 The work pertaining to the items of internal finishing should be started in consultation and with prior approval of Engineer-in-Charge as soon as the structure of two floors is completed.

- 1.39 Dismantling of cement concrete floors inside the quarters shall be done with the help of mechanized vibratory hammer, drills etc. The work shall be carried out in such a way that there should be least disturbance to the adjoining allottees and work should be completed within least possible time. The contractor must ensure that there should be no damage to the supporting RCC members.
- 1.40 All doors, windows, floors, furniture, electrical fittings and other articles shall be protected from dust, splashes & damages sufficient covering for the day's work shall be shown to the representative of the Engineer-in-charge before the contractor is allowed to proceed with the work, splashes & droppings from white washing, colour washing, distemping painting etc. on walls, floors, doors and window, down take pipes, furniture shall be removed by the contractor at his own cost and surface cleaned simultaneously after the completion of the day's work is done, without waiting for the actual completion of the other items of work of the contract. In case the contractor fails to comply with this requirement the Engineer-in-charge or his authorized representative shall be the right to get this work done at the risk and cost of the contractor either departmentally or through another agency without issue of any notice to the contractor, departmentally or through another agency without issue of any notice to the contractor, on his account. The representative of the Engineer-in-charge will however, mention about it in the site order Book employing the labour on the job at the contractor's cost.
- 1.41 Shifting of furniture such as table, chairs, glass etc. and making necessary arrangements to protect the furniture, carpets, and floors etc. from any spillage during the execution of work shall be done by the contractor. Any damage if done, shall be made good by the contractor at his own cost, nothing shall be paid extra in this regard
- 1.42 The Quarters/ Building may be made available to the contractor for execution of work in piece meal/ in parts, and the contractor shall execute the work in these quarters made available to him. The contractor shall not claim anything extra over agreement rates, due to execution of works in piece meal manner
- 1.43 Before dismantling the structure / item the contractor shall bring the entire material required for particular job at site after getting the sample approved from the Engineer in charge.
- 1.44 For mixing of mortar, M.S. sheet must be used over the brick platform. Mortar should not be mixed on road or floor or on garden. In case mortar / concrete is mixed on floor or on road etc., a recovery of Rs. 1000/- shall be made for each default. Malba should not be dumped over green grass / plants.

**(SPECIAL CONDITION AS PER NGT GUIDELINES)**

The guidelines regarding preventive measures for Air Pollution from demolition & construction activities issued by Delhi Pollution Control Committee vide No. DPCC/EIA/Res-001 to 172 /NGT-21/2015/225-408 dated 17.04.2015 in compliance of Hon'ble National Green Tribunal directions enclosed herewith are applicable to the contractor. All appropriate protection measures as per NGT & DPCC guidelines shall be taken by the contractor at his own cost. Nothing extra shall be payable to the contractor on this account)

Hon'ble National Green Tribunal in its order dated 04.12.2014 in respect of air pollution from dust resulting from demolition and construction activity inter-alia has directed as follows):

- I. No government, authority, contractor, builders or any person would be permitted to store/dump construction material or debris on metalled road.
- II Beyond the metalled road the area where such the construction material or debris can be stored shall be physically demarcated by officers of all the concerned Authorities / Corporation ensuring that it would not cause any obstruction to the free flow of traffic / inconvenience to the pedestrians. It should be ensured that no accidents occur on account of such permissible storage.
- III Every builder, contractor or person shall ensure that the construction material is covered by tarpaulin and all other precaution should be taken to ensure that no dust particles are permitted to pollute air quality as a result of such storage. It shall also be ensured that appropriate protection measures are taken by raising wind breakers of appropriate height on all sides of the plot/area using plastic and/or other similar material to ensure that no construction material dust fly outside the plot area and it will be the builder/contractor responsibility to ensure that their activity does not cause any air pollution during course of construction and/ or storage of material or construction activity. This condition shall be strictly adhered to by every builder, contractor, person or authority. In the event of default they shall be liable to be prosecuted under the law in force, as well as for causing environmental pollution and will be liable to pay compensation which would be determined by Tribunal in accordance with law.
- IV All the trucks or vehicles of any kind which are used for construction purposes/ are carrying construction material like fibreglass, plain/bitumen washers and other allied material should be fully covered. The vehicles should be properly cleaned should be dust free and every necessary precautions is to be taken to ensure that en route their destination, the dust, sand or any other particles are not permitted to be released in air/contaminate air. Any truck not complying with the above directions would not be permitted to enter Group Center Campus.

Hon'ble National Green Tribunal in order Dated 10.04.2015 inter-alia has directed as follows,

1. Every builder or owner shall put tarpaulin on scaffolding around the area of construction and the building. No person including builder, owner can be permitted to store any construction material particularly sand on any part of the street, roads in any colony.)

2. The construction material of any kind that is stored in the site will be fully covered in all respects so that it does not disperse in the Air in any form.
3. All the construction material and debris shall be carried in the trucks or other vehicles which are fully covered and protected so as to ensure that the construction debris or the construction material does not get dispersed into the air or atmosphere, in any form what so ever.
4. The dust emissions from the construction site should be completely controlled and all precautions taken in that behalf.
5. The vehicles carrying construction material and construction debris of any kind should be cleaned before it is permitted to ply on the road after unloading of such material.
6. Every worker working on the construction site and involved in loading, unloading and carriage of construction material and construction debris shall be provided with mask to prevent inhalation of dust particles.
7. Every owner and or builder shall be under obligation to provide all medical help, investigation and treatment to the workers involved in the construction of building and carry of construction material and debris relating to dust emissions.
8. It shall be the responsibility of every builder to transport construction material and debris waste to construction site, dumping site or any other place in accordance with rules and terms of this order.
9. All to take appropriate measures and to ensure that the terms and conditions of the earlier order and these orders should strictly comply with by fixing sprinklers, creations of green air barriers.
10. Compulsory use of wet jet in grinding and stone cutting.
11. Wind breaking wall around construction site.
12. The builders who are building commercial, residential complexes which are covered under the EIA Notification 2006 shall provide green belt around the building that they construct. All authorities shall ensure that such green belts are in existence prior to issuance of occupancy certificate.
13. All builders shall ensure that C&D waste is transported in terms of this order to the C&D waste site only and due record in that behalf shall be maintained by the builders, transporters and NCR of Delhi.

14. Even if constructions have been started after seeking environmental clearance under EIA notification 2006 and after taking other travel but is being carried out without taking the preventive and protective environmental steps as stated in this order and MoEF guidelines 2010, the State Government, SPCB and any officer of any department as foretasted shall be entitled to direct stoppage of work.

Environmental Impact Assessment Guidance Manual for Building, Construction, Township and area development Projects of February, 2010 is available on the website of

MoEF & CC envisaging the following guidelines for mitigation measures in respect of dust control from Building, Construction Projects):

“Adopting techniques like, air extraction equipment, and covering scaffolding, hosing down road surfaces and cleaning of vehicles can reduce dust and vapor emissions. Measures include appropriate containment around bulk storage tanks and materials stores to prevent spillages entering water courses.

15. The others measures to reduce the air pollution on site are:

- 1 Sprinkling of water and fine spray from nozzles to suppress the dust.
- 2 On-Road-Inspection should be done for black smoke generating machinery.
- 3 Promotion of use of cleaner fuel should be done.
- 4 All DG sets should comply emission norms notified by MoEF.
- 5 Vehicles having pollution under control certificate may be allowed to ply.
- 6 Use of covering sheet to prevent dust dispersion at buildings and infrastructure sites, which are being constructed.
- 7 Use of covering sheets should be done for trucks to prevent dust dispersion from the trucks, implemented by district offices.
- 8 Paving is a more permanent solution to dust control, suitable for longer duration projects. High cost is the major drawback to paving.
- 9 Reducing the speed of a vehicle to 20 kmph can reduce emissions by a large extent. Speed bumps are commonly used to ensure speed reduction. In cases where speed reduction cannot effectively reduce fugitive dust, it may be necessary to divert traffic to nearby paved areas

Material storages/warehouses- care should be taken to keep all material storages adequately covered and contained so that they are not exposed to situations where winds on site could lead to dust/particulate emissions. Fabrics and plastics for covering piles of soils and debris is an effective means to reduce fugitive dust.”

By way of these orders/notice you are hereby notified for mandatory strict adherence to and compliance of the directions contained in the order of Hon’ble Tribunal as well as MoEF guidelines, 2010 in relation to precautions required to be taken while carrying on construction activities.

(Copy of NGT orders dated 04.12.2014; 10.04.2015 copy of MoEF guidelines 2010 and copy of notice issued are available at the DPCC website also i.e.

“<http://dpcc.delhigovt.nic.in>.”

Please note that the non-compliance of Hon’ble NGT order will make you liable for

action as per law including the directions for stoppage of work.

## PARTICULAR SPECIFICATIONS

### 1.0: GENERAL

"Repair of SOS mess of 2 Sig Bn under the campus of the CC CRPF Hyderabad " with following items

- 1.1)The work shall be executed and measured as per metric dimensions given in the Schedule of quantities, drawings etc. (F.P.S. units wherever indicated are for guidance only).
- 1.2)Provision of new vitrified tiled flooring to all rooms/circulation/verandah/toilet area except washing area in place of existing CC flooring.
- 1.3)Provision of new kota stoned tiled flooring to washing area in place of existing CC flooring.
- 1.4)Provision of ceramic wall tiles to toilet and urinal area.
- 1.5) Provision of new false ceiling with gypsum plain board in dinning hall under existing CC slab of dinning hall.
- 1.6) Re-fixing of 08 nos ceiling fan with provision of additional down rod after installation of new false ceiling.
- 1.7)Provision of 10 nos new recessed light(36 watt)fitting with complete wiring to false ceiling.
- 1.8)Interior wall painting to all the wall surface of circulation/verandah/dinning/ kitchen/wash/store 1,2/commander office and toilet area.
- 1.9)Replacement of drain pipe/sanitary fitting/01 no.WC/wash basin.
- 1.10)Replacement of water supply pipe fitting to wash room/toilet etc.
- 1.11)Provision of new 01 no. SS washing sink in wash area.
- 1.12)Provision of 02 nos. urinal fitting and other misc. works.
- 1.13) All the materials required to be tested shall be tested as per provisions of the relevant I.S. Codes. Should there be any difference between acceptance CRITERIA given in I.S. Codes, C.P.W.D. specifications and special conditions, the acceptance CRITERIA shall be in the following order of precedence :
  1. C.P.W.D. Specifications 2009 Vol. I to II
  2. I.S. Codes
  3. Special/ Additional condition

## **ADDITIONAL CONDITIONS FOR CEMENT**

1.1 The contractor shall procure 43 grade (conforming to IS: 8112) Ordinary Portland cement, as required in the work, from reputed manufacturers of cement having a production capacity not less than one million tones or more per annum, such as ACC, Ultra Tech, J.P. Cement, Vikram, Shri Cement, Birla Cement, JK Cement and Cement Corporation of India etc., as approved by the Ministry of Industry, Govt. of India, and holding license to use ISI certification mark for their product. Portland puzzolana cement (fly ash based) conforming to IS: 1489 part I of equivalent grade shall also be allowed in non-structural works. The tenderers may also submit a list of names of cement manufacturers which they propose to use in the work. The tender accepting authority reserves right to accept or reject name(s) of cement manufacturer(s) which the tenderer proposes to use in the work. No change in the tendered rates will be accepted if the tender accepting authority does not accept the list of cement manufacturers, given by the tenderer, fully or partially.

The supply of cement shall be taken in 50 kg bags bearing manufacturer's name and ISI marking. Samples of cement arranged by the contractor shall be taken by the Engineer-in-charge and tested in accordance with provisions of relevant BIS Codes. In case the test results indicate that the cement arranged by the contractor does not conform to the relevant BIS Codes, the same shall stand rejected, and it shall be removed from the site by the contractor at his own cost within a week's time of written order from the Commandant (Engineer).

1.2 The cement shall be brought at site in bulk supply of quantity decided by the Commandant (Engineer). The cement godown of the required capacity to store the bags of cement shall be constructed by the contractor at site of work for which no extra payment shall be made.

1.3 Double lock provision shall be made to the door of the cement godown. The keys of one lock shall remain with the Engineer-in-charge or his authorized representative and the keys of the other lock shall remain with the contractor. The contractor shall be responsible for the watch and ward and safety of the cement godown. The contractor shall facilitate the inspection of the cement godown by the Commandant Engineer at any time.

1.4 The cement shall not be tested by Engineer-in-charge and shall be used on the work only after satisfactory test results have been received. The contractor shall supply free of charge the cement required for testing including its transportation cost of testing laboratories. The cost of test shall be borne by the contractor / department in the manner indicated below.

1.5 The actual issue and consumption of cement on work shall be regulated and proper accounts maintained as provided in contract.

1.6 The cement brought to the site and the cement remaining unused after completion of the work shall not be removed from site without the written permission of the Commandant (Engineer), South Zone.

1.7 The damaged cement shall be removed from the site immediately by the contractor on receipt of a notice in writing from the Commandant (Engineer), South Zone. If he does not do so within

three days of receipt of such notice, the Commandant (Engineer), South Zone shall get it removed at the cost of the contractor.

## **CONTRACTOR'S LABOUR REGULATIONS**

1. These regulations may be called the "Contractors Labour regulations".
2. If these regulation, unless otherwise expressed or indicated the words and expressions shall have the meaning hereby assigned to them respectively that is to say.

"Labour" means worker employed by the Corporation's contractor directly or indirectly through a subcontractor or other persons or by an agent on his behalf.

(2)

19.5.1969 ("Fair Wages" means wages whether for time or piece work notified at the time of inviting Tenders for work and where such wages prescribed by the Government of India in the Ministry of Labour and Employment vide SO No.1917 published in the Gazette of India. Extraordinary Part 11 Section (3) subsection (ii) dated 19.5.1969)

(3) "Contractor" shall include every person whether a sub-contractor or headman or agent employing labour on the work taken on contract.

(4) "Wages" shall have the same meanings as defined in the payment of Wages Act and include time and piece rate wages.)

- 2(a). Normally working hours of an adult employee should not exceed 9 hours a day; the working day shall be so arranged that inclusive of interval for rest, if any it shall not spread even more than 12 hours on any day.)
- 2(b). When an adult worker is made to work for more than 9 hours on any day or for more than 48 hours in any week he shall be paid overtime for the extra hours put in by him at double the ordinary rate of wages.
- 2(c). Every worker shall be given a paid weekly holiday normally on Sunday in accordance with the provisions of minimum wages (central rules, 1960 as amended from time to time irrespective of whether such worker is governed by the Minimum Wages Act 1948 or not).

3. Display of Notice regarding Wages etc. The contractor shall :

(a)

Before the commences his work on contract display and correctly maintain and continue to display and correctly maintain in a clean and legible condition in conspicuous places on the work, Notice in English and in the local Indian Language spoken by the majority workers, giving the rate of wages which have been certified by the Executive Engineer, Regional Labour Commissioner, as fair wages and the hours of work for which such wages are earned and)

(b) Send a copy of such Notices to the certifying officer.)

4. Payment of wage

(i) Wages due to every worker shall be paid to him directly.

(ii) All wages shall be paid in current coin or currency or in both.

(iii) Arrears claimed after 3 months after the completion of work shall not be entertained.

5. Fixation of Wage Period

(i) The contractor shall fix the wage period in respect of which the wages shall be payable. The minimum daily rates of wages fixed under Notification of Government of India in the Ministry of Labour and Employment S.O. 1971 dated 19th May, 1969 are inclusive of wages for weekly day of rest and the question of extra payment for weekly holiday would not arise.

(i) No wage period shall exceed one month.)

(ii) Wages of every worker employed on the contract shall be paid

(a) in case of establishment in which wage period is one week within 3 days from the end of the wages period and)

(b) In the case of other establishments before the expiry of the 7th day or 10th day from the end of the wage period according as the number of workers employed in such establishments does not exceed 1000 or exceeds 1000.

(iii) When the employment of any worker is terminated by or on behalf of the contractor the wages earned by him shall be paid before the expiry of the day exceeding the one on which his employment is terminated.

(iv) All payment of wages shall be made on a working day except when the work is completed before the expiry of wage period; in which case final payment shall be made within 48 hours of the last working day at work site and during the working time.

NOTE: - The term "working day" means a day on which the work on which the labour is employed, is in progress.

6. Wage Book and Wage Slips etc. :-

(i) The contractor shall maintain a Wage Book of each worker in such form as may be convenient at the place of work, but the same shall include the following particulars.)

(a) Name of the worker

(b) Rate of daily or monthly wages

(c) Nature of work on which employed

(d) Total number of days worked

7. Register of unpaid wages : The contractor shall maintain a register of unpaid wages in such form as may be convenient at the place of work but the same shall include the following particulars.

- a) Full particulars of the labourers where wages have not been paid
- b) Reference number of the muster roll and wage register.
- c) Rate of wages
- d) Wage period
- e) Total amount not paid
- f) Reasons for not making payment
- g) How the amount of unpaid wages was utilized
- h) Acquaintance with date

8. Register of Accidents

The contractor shall maintain register of accidents in such form as may be convenient at the work place but the same shall include the following particulars): -

- (a) Full particulars of the labourers who met with accident
- (b) Rate of Wages)
- (c) (Sex)
- (d) (Age)
- (e) Nature of accident and cause of accident
- (f) Time and date of accident
- (g) Date and time when admitted in hospital
- (h) Date of discharge from the hospital
  - (i) Period of treatment and result of treatment
  - (j) (Percentage of loss of capacity and disability as assessed by Medical Officer
  - (k) Claim required to be paid under Workman's Compensation Act.
- (l) Percentage of loss of capacity and disability as assessed by Medical Officer
- (m) Amount paid with details of persons to whom the same was paid
- (n) Authority by whom the compensation was assessed

( Signature of Tender Form issuing officer)

( Signature of Tenderer)

## (SAFETY CODE)

(Safety Code):-

(i)

Suitable scaffolds should be provided for workmen for all works that cannot safely be done from the ground or from solid construction except such short period works as can be done safely from ladders. When a ladder is used an extra man shall be engaged for holdings the ladder and if the ladder is used for carrying material is well, suitable footholds and handholds shall be provided on the ladder and the ladder shall be given an inclination not steeper than  $\frac{1}{4}$  to 1 (4 horizontal and 1 vertical).

(ii)

Scaffolding or staging more than 12 ft. Above the ground or floor, swung or suspended from an overhead support or erected with stationary support shall have guard rail properly attached bolted, braced and otherwise secured at least 3 feet high above the floor or platform of such scaffolding or staging and extending along with entire length of the outside and ends thereof with only such opening as may be necessary for the delivery of materials. Such scaffolding shall be so fastened as to prevent it from swaying from the building or structure.

(iii) Working platform, gangways, and stairways should be so constructed that they should not sag unduly or unequally and if the height of the platform or the gangway or the stairway is more than 12 feet above ground level or floor level, they should be closely boarded, should have adequate width and should be suitably fastened, as described in (ii) above.

(iv) Every opening in the floor of a building or in a working platform be provided with suitable means to prevent the fall of persons or materials by providing suitable fencing or railing whose minimum height shall be 3'-0".

(v)

Safe means of access shall be provided to all working platforms and other working places. Every ladder shall be securely fixed; no portable single ladder shall be over 30 feet in length while the width between side rail in rung ladder shall in no case be less than 11-1/2" for ladder up to and including 10 feet in length. For longer ladders this width should be increased at least 1/2" for each additional foot or length. Uniform step spacing shall not exceed 12. Adequate precautions shall be taken to prevent danger from electrical equipment's. No materials on any of the sites of work shall be so stacked or placed as to cause danger or inconvenience to any person of the public. The contractor shall provide all necessary fencing and lights to protect the public from accidents, and shall be bound to bear the expenses of defence of every suit, action or other proceedings at law that may be brought by any person for injury sustained owing to neglect of the above precautions and to pay any damages and cost which may be awarded in any such suit, action or proceedings to any such persons or which may with the consent of the contractor be paid to compromise any claim by any such persons.

(vi)

Excavations and Trenching All trenches four feet or more in depth, shall at all times be supplied at least one ladder for each 100 feet in length or fraction thereof ladder shall be extended from bottom of trench to at least 3" above the surface of the ground, the side of trench which are 5", or more in depth shall be stepped back to give suitable slope or security held by timber bracing so as to avoid the danger of side to collapse. The material shall not be placed within 5 feet of the trench or half of the depth of trench whichever is more. Cutting shall be done from top to bottom. Under no circumstances undermining or undercutting shall be done

(vii)

Before any demolition work is commenced and also during the process of the work:

(a) all roads and open areas adjacent to the work site shall either be closed or suitably protected;

(b) No electric cable or apparatus which is liable to be a source of danger over a cable or apparatus used by the operator shall remain electrically charged.

(c) Practical steps shall be taken to prevent danger to persons employed from risk of fire or explosion or flooding. No floor, roof or other part of the building shall be over-loaded with debris or a material as to render it unsafe.

(viii) All necessary personal safety equipment as considered adequate by the Engineer-in-charge should be kept available for the use of the person employed on the site and maintained in a condition suitable for immediate use and the contractor should take adequate steps to ensure proper use of equipment by those concerned.

(a) Worker employed on mixing asphaltic materials, cement and lime mortar shall be provided with protective footwear and protective goggles.

(b) Those engaged in white washing and mixing or staking of cement bags or any material which is injurious to the eyes shall be provided with protective goggles.

(c) Those engaged in welding works shall be provided with welder's protective eye shields.

(d) Stone breakers shall be provided with protective goggles and protective clothing and seated at sufficiently safe intervals.

(e) When workers are employed in sewers and manholes, which are in use, the contractor shall ensure that the manhole covers are opened and are ventilated at least for an hour before the workers are allowed to get into the manholes and the manholes so opened shall be cordoned off with suitable railing and provided with warning signals or boards to prevent accident to the public.

(f) The contractor shall not employ men below the age of 18 years and women on the work of painting with products containing lead in any form. Wherever men above the age of 18 years are employed on the work of lead painting the following precautions should be taken.

(g) No paint containing lead or lead products shall be used except in the form of paste or ready-made paint.

(h) Suitable face masks should be supplied for use by the workers when paint applied in the form of spray or a surface having lead paint dry rubbed and scrapped.

(i) Overalls shall be supplied by the contractors to the Workmen and adequate facilities shall be provided to enable the working painters to wash during the course of work.

(j) When the work is done near any place where there is risk of drowning, all necessary equipment should be provided and kept ready for use and all necessary steps taken for prompt rescue at any person in danger and adequate provision should be made for prompt first aid treatment of all injuries likely to be sustained during the course of the work.

(k) Use of hoisting machine and tackle including their attachments anchorage supports shall conform to the following standards or conditions):

1. (a) These shall be of good mechanical construction, sound materials and adequate strength and free from patent defect and shall be kept in good repair and in good working order.

(b) Every rope used in hoisting or lowering, materials or as a means of suspension shall be of durable quality and adequate strength, and free from patent defects.

2. In case of departmental machines, the safe working load shall be notified by the THE COMMANDANT, 2 SIGNAL BN CRPF Hyderabad. As regards contractor's machines the contractors shall notify the safe working load of the machine to the TheCommandant 2 Signal Bn CRPF Hyderabad whenever he brings any machinery to site of work and get it verified by the TheCommandant 2 Signal Bn CRPF Hyderabad.

(ix)

Motors, gearing transmission, electric wiring and other dangerous parts of hoisting appliances should be provided with efficient safeguards. Hoisting appliances should be provided with such means as will reduce to the minimum, the risk of accidental decent of the load, adequate precautions should be taken to reduce and to minimize; the risk of any part of a suspended load becoming accidentally displaced. When workers employed on electrical installations which are already energized insulting mats, wearing apparel, such as gloves, sleeves and boots as may be necessary should be provided. The workers should not wear any rings, watches and carry keys or other materials which are good conductors of electricity.

(x)

All scaffolds, ladders and safety devices mentioned or described herein shall be maintained in safe condition and no scaffold, ladder or equipment shall be altered or removed while it is in use. Adequate washing facilities should be provided at or near places of work.

(xi)

These safety provisions should be brought to the Notice of all concerned by display on a Notice board at prominent place at work spot. The person responsible for compliance of the safety code shall be named therein by the contractor.

(xii) To ensure effective enforcement of the rules and regulations relating to safety precautions, the arrangement made by the contractor shall be open to inspection by the Labour Officer, The Commandant Engineer of department for their Representatives.

(xiii) Notwithstanding the above clauses from (i) to (xiv) there is nothing in these to exempt the contractor from the operations of any other Act or rule in force in the Republic of India

**(Model Rules for the Protection of Health  
and Sanitary Arrangements for Workers  
Employed By Contractor)**

1. (Application):

These rules apply to all building and construction works in-charge of Central Reserve Police Force

2. (Definition):

“Workplace” means a place at which, at an average 20 or more workers are employed in connection with construction work.

3. (First Aid):

(a)

At every work place there shall be maintained in a readily accessible place first aid appliance including an adequate supply of sterilized dressings and sterilized cotton wool. The appliances be kept in good order and in large work place they shall be placed under the charge of a responsible person who shall be readily available during working hours.

(b)

At large work place, where hospital facilities are not available within easy distance of the work. First Aid post shall be established and be run by a trained compounder.

- (c) Where the large work places are remote from regular hospitals, indoor ward shall be provided with one bed for every 250 employees.
- (d) Where large work places are situated in cities, in town or in their suburbs and no beds are considered necessary owing to the proximity of city or town hospitals suitable transport shall be provided to facilitate removal of urgent cases to the hospitals. At other work places, some conveyance facilities, such as a car shall be kept readily available to injured person or persons suddenly taken seriously ill to the nearest hospital.)

4. (Drinking Water):

- (a) In every work place, there shall be provided and maintained at suitable places easily accessible to labour a sufficient supply of cold water fit for drinking.
- (b) Where drinking water is obtained from intermittent public water supply, each work place shall be provided with storage where such drinking water shall be stored.
- (c) Every water supply of storage shall be at a distance of not less than 50 feet from any latrine, drain or other source of pollution. Where water has been drawn from an existing well which is within such proximity of latrine, drain or any other source of pollution, the well shall be properly chlorinated before water is drawn from it for drinking. All such wells shall be entirely closed in and be provided with a trap-door which shall be dust free and waterproof.
- (d) A reliable pump shall be fitted to each covered well the trap-door shall be kept locked and opened only for cleaning or inspection which shall be done at least once a month.

5. Washing and Bathing Place:

- (i) Adequate washing and bathing places shall be provided, separately for men and women
- (ii) Such places shall be kept in clean and drained condition

6. Scale of Accommodation in Latrines and Urinals:

These shall be provided within the precincts of every workplace latrines and urinals in an accessible place, and the accommodation, separately for each of them: shall not be less than the, following scale

	Nos of Sheets
(Where the number of person does not exceed 50)	2
(Where the number of persons exceeds 50, but does not exceeds 100)	3
(For every additional 100)	3 per 100

In particular cases the Engineer- in-Charge shall have the powers to vary the scale necessary.

#### 7. Latrines and Urinals for Women:

If women are employed separate latrines and urinals, screened from those for men and marked in the vernacular in conspicuous letters. "For Women only" shall be provided on the scale laid in rule 6. Those for men shall be similarly marked "For men only". A poster showing the figure of a man and a woman shall also be exhibited at the entrance of latrines for each sex. There shall be adequate supply of water close of the urinals and latrines.

#### 8. (Latrines and Urinals):

Except in work places provided with water flushed latrines, connected with a water borne sewage system, all latrines shall be provided with receptacles on dry-earth system which shall be cleaned at least four times daily and at least twice during working hours and kept in a strictly sanitary condition. The receptacles shall be tarred inside and outside at least once a year.

Unless otherwise arranged for by the local sanitary authority arrangements for proper disposal of Excreta by incineration at the work place shall be made by means of suitable incinerator Approved by the Assistant Director of Public Health or the Municipal Medical Officer of health, as the case may be, in whose jurisdiction the work place is situated.

Alternatively excreta may be disposed off by putting a layer of night soil at the bottom of pucca tank prepared for the purpose and covering it with a 6" layer of waste or refuse and then covering it up with a layer of earth for a fortnight (when it will turn into manure)

#### 11. Provision of Shelters during rest:

At every work place there shall be provided, free of cost, two suitable sheds one for meals and the other for rest separately for men and women for the use of labour. The height of the shelter shall not be less than 11 feet from the floor level to the lowest part of the roof. The sheds should be roofed with at least thatch and mud flooring will be provided with a dwarf wall around not less than 2-1/2 feet. Sheds should be kept clean and space should be on the basis of at least 5 square feet per head.

#### 12. Creches:

At every work place, at which 50 or more women workers are ordinarily employed, there shall be provided two huts for the use of children under the age of 8 years belonging to such women. One hut shall be used for infant's games and play and the other as their bed room. The huts shall not be constructed on a lower standard than the following.

(i) Thatched roof

(ii) Mud floors and walls

(iii) Planks spread over the mud floor and covered matting.

The huts shall be provided with

suitable and sufficient openings for light and ventilation. There shall be adequate provision of sweeper to keep the place clean. There shall be two Dais in attendance. Sanitary utensils shall be provided to the satisfaction of the Health Officer of the area concerned. The use of the hut shall be restricted to children their attendants and mothers of the children.

Where the number of women workers is more than 25 but less than 50, the contractor shall provide at least one hut and one Dais to look after the children of women workers.

The size of crèche or crèches shall vary according to the number of women workers.  
(The crèche or crèches shall properly be maintained and necessary equipment like toys etc. shall be provided.

13. Canteen:-

A cooked foods canteen on moderate scale shall be provided for the benefit of workers wherever it is considered expedient.

14. The above rules shall be incorporated in the contracts and in Notices inviting Tenders and shall form an integral part of the contract.

## CONDITIONS OF CONTRACT

(Definition)

1. The Contract means the documents forming the Tender and acceptance thereof and the formal Agreement executed between the Competent Authority and the contractor, together with the documents referred to therein including these conditions, the specifications, designs, drawings and instructions issued from time to time by Competent Authority and all these documents taken together, shall be deemed to form one contract and shall be complementary to one another.

2. In the contract the following expression shall, unless the context otherwise requires, have the meaning, hereby respectively assigned to them: -

a) The expression 'Work' or work shall, unless there be something either in the subject or context repugnant to such construction, be construed and taken to mean the work by or by virtue of the contract contracted to be executed whether temporary or permanent, and whether original, altered, substituted or additional.

b) The 'Site' shall mean the land or other places on, into or through which work is to be executed under the contract or any adjacent land, path or street through which work is to be executed under the contract or any adjacent land, path or street which may be allotted or used for the purpose of carrying out the contract.

c) The 'Contractor' shall, mean 'the individual or Firm or Company, whether incorporated or not undertaking the work and shall include the legal personal Representatives of such individual or the persons comprising such firm or company, or the successors of such company and the permitted assignees of such individual or firm or firms or company.

d) The 'Force' means the Central Reserve Police Force and its successors.

e) Commandant Engineer, South Zone will be competent engineering authority for the work.

3. Where the context so required, words imparting the singular only also include the plural and vice versa. Any reference to masculine gender shall wherever required include feminine gender and vice versa

4. The contractor shall be deemed to have satisfied himself before tendering as to the correctness and sufficiency of his tender for the works and of the rates except as otherwise provided, cover all his obligations under the Contract and all matters and things necessary for the proper completion and maintenance of the work

5. In the case of discrepancy between the schedule of Quantities, and the Specifications etc., the following

Order of preference shall be observed:

Description of Schedule of Quantities.

Particular Specification and Special Conditions, if any

iii) CPWD Specifications.

iv) Indian Standard Specifications of BIS.

v) Specification notified by local bodies, if any.

(If there are varying or conflicting provisions made in any one document forming part of the contract, the Accepting Authority shall be the deciding authority with regard to the intention of the document and his decision shall be final and binding on the contractor. Any error in description, quantity or rate in Schedule of Quantities or any omission there from shall not vitiate the Contract or release the Contractor from the execution of the whole or any part of the works comprised therein according to drawings and specifications or from any of his obligations under the contract. )

(Clause-1)

(I)

The contractor shall submit an irrevocable Performance Guarantee of 3% (Three percent) of the Tendered amount in addition to other deposits mentioned elsewhere in the contract for his proper performance of the contract agreement (notwithstanding and/or without prejudice to any other provisions in the contract within period specified in Schedule "F" of „BID Data Sheet" from the date of issue of letter of acceptance. This period can be further extended by the Engineer-in-Charge upto a maximum period as specified in Schedule F' on written request of the contractor stating the reason for delays in procuring the Performance Guarantee to the satisfaction of the Engineer-in-Charge. This Guarantee shall be in the form of Cash, in case Guarantee amount is less than Rs. 10,000/- or Deposit at Call receipt of any Scheduled Bank / Banker's Cheque of any Scheduled Bank /Demand Draft of any Scheduled Bank /Pay Order of any Scheduled Bank in case of Guarantee amount is less than Rs.1,00,000/- or Government Securities or Guarantee Bonds of any Scheduled Bank or the State Bank of India in accordance with the Form annexed hereto In case the Guarantee amount is more than Rs. One Lakh.)

(II)

The Performance Guarantee shall be initially valid upto the stipulated date of completion plus 60 days beyond that, in case the time for completion of work gets extended, the contractor shall get the validity of Performance Guarantee extended to cover such extended time for completion of work. After recording of the completion certificate for the work by the competent authority, the Performance Guarantee shall be returned to the contractor without any interest.

(III)

The Competent Authority shall not make a claim unearth Performance Guarantee except for amounts to which the Central Reserve Police Force is entitled under the contract (notwithstanding and /or without prejudice to any other provisions in the contract agreement) in the event of

(a) Failure by the contractor to extend the validity of the Performance Guarantee as described hereinabove, in which event the Competent Authority may claim the full amount of the Performance Guarantee.

(b) Failure by the contractor to pay CRPF any amount due, either as agreed by the contractor or determined under any of the Clauses/Conditions of the Agreement, within 30 days of the service of Notice to this effect by The Competent Authority.

- i) In the event of the contract being determined or rescinded under provision of any of the Clause/Condition of the agreement, the Performance Guarantee shall stand forfeited in full and shall be absolutely at the disposal of the CRPF.

(CLAUSE 1A) :

Upon reporting of completion of the work by the contractor, a board of officers detailed by THE COMMANDANT, 2 SIGNAL BN CRPF Hyderabad will inspect the whole work and will submit the report to THE COMMANDANT, 2 SIGNAL BN CRPF Hyderabad. If the work is found satisfactory, the report will be forwarded to Commandant (Engineer) for perusal. Which will then be approved by Commandant Engineer and the bill will be forward to RPAO for payment to the contractor in full and at the same time security/performance deposit will also be given him back.

#### ABSTRACT OF COST-ORIGINAL ESTIMATE

SL No	DSR 2021	Description of Item	Qty.	Unit
1	11.41.1	Providing and laying vitrified floor tiles in different sizes (thickness to be specified by the manufacturer) with water absorption less than 0.08% and conforming to IS:15622 of approved make in all colours and shades laid on 20mm thick cement mortar 1:4 (1 cement: 4 coarse sand) jointing with grey cement slurry @ 3.3 kg/sqm including grouting the joints with white cement and matching pigments etc size of (Tile 500x500 mm)	271.56	Sqm
2	11.26	Kota stone slab flooring over 20 mm (average) thick base laid over and jointed with grey cement slurry mixed with pigment to match the shade of the slab, including rubbing and polishing complete with base of cement mortar 1:4 (1 cement: 4 coarse sand)	21.76	Sqm
3	8.31	Providing and fixing 1st quality ceramic glazed wall tiles conforming to IS:15622 (thickness to be specified by the manufacturer) of approved make in all colours, shades except burgundy, bottle green, black of any size as approved by engineer-in-charge in skirting, risers of steps and dados over 12 mm thick bed of cement mortar 1:3 (1 cement: 3 coarse sand) and jointing with grey cement slurry @ 3.3 kg per sqm including pointing in white cement mixed with pigment of matching shade complete	30.5	Sqm

4	12.45	Providing and fixing false ceiling at all height including providing and fixing of frame work made of special sections, power pressed from M.S sheets and galvanized with zinc coating of 120 gms/sqm (both side inclusive) as per IS:277 and consisting of angle cleats of size 25 mm wide x 1.6 mm thick with flanges of 27 mm and 37 mm at 1200 mm centre to centre , one flange fixed to the ceiling with dashfastener 12.5 mm dia x50 mm long with 6 mm dia bolts, other flange of cleat fixed to the angle hangers of 25x10x0.50 mm of required length with nuts and bolts of required size and other end of angle hanger fixed with intermediate GI channels 45x15x0.9 mm running at the spacing of 1200 mm centre to centre to which the ceiling section 0.5 mm thick bottom wedge of 80 mm with tapered flanges of 26 mm each having lips of 10.5 mm at 450 mm centre to centre shall be fixed in a direction perpendicular to GI intermediate channel with connecting clips made out of 2.64 mm dia x 230 mm long GI wire at every junction including fixing perimeter channel 0.5 mm thick 27 mm high having flanges of 20 mm and 30 mm long the perimeter of ceiling fixed to wall/partition with the help of rawlplugsat 450 mm centre with 25 mm long dry wall screws @ 230 mm interval including fixing of gypsum board to ceiling section and perimeter channel with the help of dry wall screws of size 3.5 x 25 mm at 230 mm c/c including jointing and finishing to flush finish of tapered and square edges of the board with recommended jointing compound,jointing tapes, finishing with jointing compound in 3 layers covering upto 150 mm on both sides of joint and 2 coats of primer suitable for board, all as per manufacturer's specification and also including the cost of making openings for light fitting, grills, diffusers, cutouts made with frame of perimeter channels suitably fixed all complete as per drawings, specification and direction of the engineer-in-charge but excluding the cost of painting with		
	12.45.1	12.5 mm thick tapered edge gypsum plain board conforming to IS:2095-(part I):2011(board with BIS certification marks)	129.6	Sqm
5	13.11	Distempering with I st quality acrylic distemper (ready made)having VOC content less than 50 gm per ltr of approved manufacturer and of required shade and colour complete as per manufacturer's specification	723.28	Sqm
6	13.99	Painting with synthetic enamel paint of approved brand and manufacture of required colour to give an even shade	93.26	Sqm
7	14.8	Providing and fixing white vitreous china water closet squatting pan(Indian type) along with P and S trap includingdismantaling of old WC seat and S or P trap at the site complete with all operation including all necessary material, labour and disposal of dismantled materials/malba, all complete as per direction of engineer-in-charge		
	14.80.1	Long pattern WC pan size 580x440 mm	1	Each
8	22.5	Providing and laying water proofing treatment in sunken portion of WCs, bathroom etc. by applying cement slurry mixed with water proofing cement compound consisting of applying	1.6	Sqm

9	18.7	Providing and fixing chlorinated polyvinyl chloride (CPVC) pipes having thermal stability for hot and cold water supply including all CPVC plain and brass threaded fitting including fixing the pipe with clamps at 1.00 m spacing this includes jointing of pipe and fitting with one step CPVC solvent cement and testing of joints complete as per direction of engineer-in-charge		
	18.7.1	15 mm nominal dia pipes	40	Mtrs
10	17.7	Providing and fixing wash basin with CI brackets, 15 mm CP brass pillar taps, 32 mm CP brass waste of standard pattern including painting of fitting and brackets , cutting and making good the walls wherever require		
	17.7.7	White vitreous china flat back wash basin size 450 x 300 mm with single 15 mm CP brass pillar tap	1	Each
11	17.23	Providing and fixing white vitreous china flat back or wall corner type lipped front urinal basin of 430x260x350 mm or 340x410x265 mm sizes respectively	2	Each
12	17.10	Providing and fixing stainless steel A ISI:304(18/8) kitchen sink as per IS:13983 with CI brackets and stainless steel plug 40 mm including painting of fittings and brackets, cutting and making good the walls wherever required		
	17.10.1	Kitchen sink with drain board		
	17.10.1.1	510x1040 mm bowl depth 250 mm	1	Each
13	12.41	Providing and fixing on wall face unplasticised rigid PVC rain water pipes conforming to IS:13592 type A including jointing with seal ring conforming to IS:5382 leaving 10 mm gap for thermal expansion(i) single socketed pipes		
	12.41.1	75 mm diameter	60	Mtrs
14	18.15	Providing and fixing brass bib cock of approved quality		
	18.15.1	15 mm nominal bore	4	Each
15	18.16	Providing and fixing brass stop cock of approved quality		
	18.16.1	15 mm nominal bore	2	Each
16	17.18	Providing and fixing PVC low level flushing cistern with manually controlled device(handle lever) conforming to IS:7231 with all fitting and fixtures complete		
		10 litre capacity-white	1	Each
17	18.53	Providing and fixing CP brass angle valve for basin mixer and geyser points of approved quality conforming to IS:8931		
	18.53.1	15 mm nominal bore	2	Each
18	13.8	Providing and applying white cement based putty of average thickness 1 mm of approved brand and manufacturer over the plastered wall surface to prepare the surface even and smooth complete	597	Sqm
		ELECTRICAL		
19	1.45	Installation, testing and commissioning of ceiling fan including wiring the down rods of standard length(upto 30 mm) with 1.5 sq mm FRLS PVC insulated copper conductor, single core cable including providing and	8	Each

		fixing phenolic laminated sheet cover on the fan box etc. as required		
20	1.48	Supplying and fixing extra conduit down rod of 20 cm length GI pipe 15 mm dia heavy gauge including painting etc.as required(Note:More than 5 mm length shall be rounded to the nearest 10 cm and 5 cm or less shall be ignored)	8	Each
21	1.55	Wiring for group controlled(looped) light point/fan point/exhaust fan point/call bell point(with out independent switch etc.)with 1.5 sq mm FRLS PVC insulated copper conductor single core cable in surface/recessed PVC conduit and earthing the point with 1.5 sq mm FRLS PVC insulated copper conductor single core cable etc. as required		
	1.55.1	Group A	10	POINT
22	1.23	Supplying and fixing following piano type switch/socket on the existing switch box/cover including connection etc. as required		
	1.23.1	5/6 amps switch	10	Each
